

**UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF TEXAS
MARSHALL DIVISION**

SPEECH TRANSCRIPTION, LLC,

Plaintiff

v.

EXABEAM, INC.,

Defendant

Case No. 2:23-cv-605

Jury Trial Demanded

FIRST AMENDED COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Speech Transcription, LLC (“Plaintiff” and/or “ST”) files this First Amended Complaint against Exabeam, Inc. (“Defendant” or “Exabeam”) for infringement of United States Patent No. 8,938,799 (hereinafter “the ’799 Patent”).

PARTIES

1. Plaintiff is a Wyoming limited liability company having an address at 1 East Broward Boulevard, Suite 700, Ft. Lauderdale, FL 33301.

2. Upon information and belief, Defendant is a corporation organized and existing under the laws of the State of Delaware with its principal place of business at 1051 E. Hillsdale Blvd., 4th Floor, Foster City, CA 94404. On information and belief, Exabeam may be served through its registered agent in the State of Delaware: Incorporating Services, Ltd. at 3500 S. Dupont Hwy., Dover, DE 19901.

JURISDICTION AND VENUE

3. This action arises under the patent laws of the United States, 35 U.S.C. § 271 et

seq. Plaintiff is seeking damages, as well as attorney fees and costs.

4. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331 (Federal Question) and 1338(a) (Patents).

5. On information and belief, this Court has personal jurisdiction over Defendant because Defendant has committed, and continues to commit, acts of infringement in this District, has conducted business in this District, and/or has engaged in continuous and systematic activities in this District.

6. On information and belief, Defendant's instrumentalities that are alleged herein to infringe were and continue to be used, imported, offered for sale, and/or sold in this District.

7. Venue is proper against Defendant in this District pursuant to 28 U.S.C. § 1400(b) and 1391(c) because it has maintained an established and regular place of business in this District and has committed acts of patent infringement in the District from those regular and established places of business. *See In re: Cray Inc.*, 871 F.3d 1355, 1362-1363 (Fed. Cir. 2017). *See* Figures 1 and 2 below.

Figure 1
(source: <https://www.exabeam.com/contact/>)

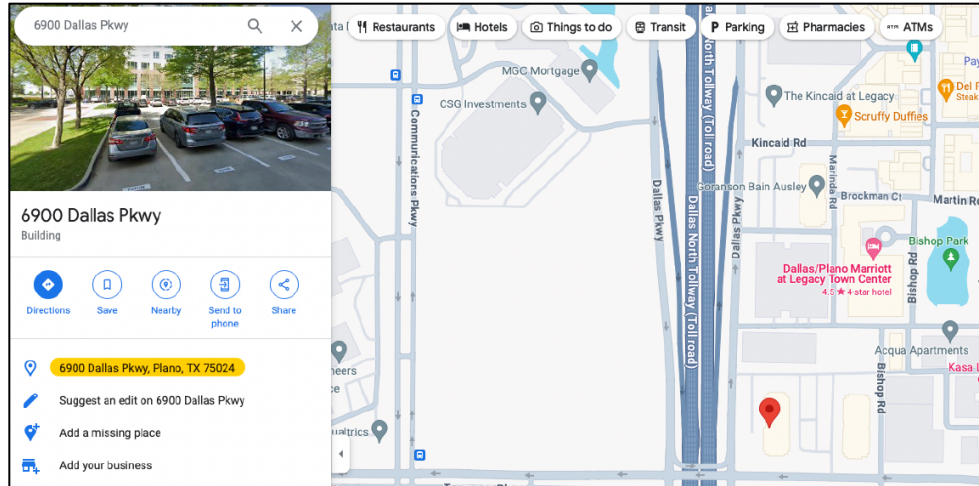

Figure 2
(source: Google Maps)

8. Venue is proper in the Western District of Texas as to Defendant pursuant to at least 28 U.S.C. §§ 1391(c)(2) and 1400(b). As noted above, Defendant maintains a regular and established business presence in this District.

PATENT-IN-SUIT

9. Plaintiff is the sole and exclusive owner, by assignment, of U.S. Patent No. 8,938,799 (hereinafter “’799 Patent”). The ’799 Patent is attached as Exhibit A.

10. The ’799 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

11. Plaintiff possesses all rights of recovery under the ’799 Patent, including the exclusive right to recover for past, present and future infringement.

12. The priority date of the ’799 Patent is at least as early September 14, 2004. As of the priority date, the inventions as claimed were novel, non-obvious, unconventional, and non-routine.

13. Plaintiff alleges infringement on the part of Defendant of the ’799 Patent.

14. The '799 Patent relates generally to a unified security management system and related apparatus and methods for protecting endpoint computing systems and managing, providing, and obtaining security functions. *See* Abstract, '799 Patent. The endpoint devices may be of different forms such as desktop PC, laptop, a workstation, PDA, cell phone, smartphone, set-top box etc.. In one embodiment, a subsystem related to an endpoint is used to support a unified security management system, with the subsystem providing an open platform for repository of defense functions from any participating vendors' software modules.

15. As noted, the claims of the '799 Patent have priority to at least September 14, 2004. The deficiencies in the state of the art as of the Date of Invention were highly problematic. Attacks on computer systems have advanced in variety and sophistication. *See* '799 Patent at 1:30-31. Conventionally, the deployment of defense functions in enterprise networks can be network-based or host-based, or both. The host-based deployment requires multiple defense function software modules to be installed in each host. The deployment of immunization functions is generally host-based and requires an agent to be installed in each host for each supported immunization function. Consequently, a deployed security infrastructure consisting of multiple defense and immunization functions may burden the host with multiple defense function software and a number of agents for supporting the corresponding immunization functions. This situation may create software conflict and registry corruption issues in the host and cause end-user productivity loss and unnecessary IT labor cost for testing and validation, which may be exacerbated as the software upgrade/patch incidences for security functions and operating system increase. It may also create issues such as performance degradation and security vulnerability where security functions may be disabled by malware or human carelessness. In addition, the aforementioned multiple defense and immunization functions are managed by multiple vendors'

management systems. The resulting heterogeneous environment gives rise to duplicated processes and technical and management complexity, leading to high total-cost-of-ownership (TCO) and low return-on-investment (ROI). *See* '799 Patent at 3:49-67.

16. In addition, the vast majorities of residential internet users generally do not have sufficient knowledge on computer security, and thus are unlikely to have adequate security protection. Another observation is that the user may experience disruptions that require retries and/or reboots during a security function download, and computer behavior changes after the download. Another observation is that it is generally costly to acquire an adequate number of defense and immunization functions. *Id.* at 4:38-46.

17. One practical aspect of security for the residential user is the need to subscribe to and pay for multiple security services. Billing and user payments are largely handled via separate subscriptions, separate bills, and separate payment processes. Another observation is that numerous security vendors in the marketplace are available to provide various solutions to counter various security threats. These vendors desire exposure to potential markets. Users desire exposure to information about available security products that may be subscribed to or otherwise obtained. Despite the existence of information sources on the Internet and elsewhere, the necessary processes of identifying desirable vendors and products are inconvenient and often time consuming. *Id.* 4:50-63.

18. Password management is integral to overall endpoint security, and is associated with many unmet needs, both for residential users and especially for enterprise endpoint users and IT managers. It is difficult for end users to remember numerous and periodically changing sets of passwords/user IDs, and so end users oftentimes choose not to conform to security policy or practice and instead, for example, write passwords/user IDs information down on a post-on or

into a computer file. For end users who do conform to good security practice, may forget their passwords and/or user IDs, and they must typically call a helpdesk and request a password reset in order to re-enter applications, or they must via other means obtain a new password/user ID pair. This process reduces end user productivity and adds an extra load and cost to already burdened helpdesk. *See* '799 Patent at 4:66 – 5:13.

19. The claims of the '799 Patent overcome deficiencies existing in the art as of the date of invention, and comprise non-conventional approaches that transform the inventions as claimed into substantially more than mere abstract ideas.

20. The claims of the '799 Patent are not drawn to laws of nature, natural phenomena, or abstract ideas. The claims of the '799 Patent have physical, tangible and specialized components that are directed to more than performance of an abstract idea. For example, the claims of the '799 Patent include elements such as processors, coprocessors, digital signal processors, acceleration circuitry, reconfigurable circuitry, data storage, a unified interface converter, and security subsystems. The specific combinations of elements, as recited in the claims, were not conventional or routine at the time of the invention.

21. Further, the claims of the '799 Patent contain inventive concepts. Even if a court ruled the underlying aspects to be abstract, the inventive concepts disclosed in sufficient detail would transform the claims into patent-eligible subject matter. For example, the claims of the '799 Patent recite systems and methods resulting in improved functionality of the claimed systems and represent technological improvements to the operation of computers.

22. The '799 Patent was examined by Primary United States Patent Examiner Aravind Moorthy. During the examination of the '799 Patent, the United States Patent Examiner searched for prior art in the following US Classifications: G06F 211604 (2013.01); G06F 21/564

(2013.01); G06F 21/577 (2013.01); G06F 21/56 (2013.01); G06F 21/64 (2013.01); H04L 63/1416 (2013.01); H04L 63/1408 (2013.01); H04L 63/1441 (2013.01); G06F 21/57 (2013.01).

23. The claims of the '799 Patent are patent eligible under 35 U.S.C. § 101, 102, 103, and 112, as reflected by the fact that the Patent Examiner allowed the claims of the Asserted Patent over prior art as disclosed and of record during the prosecution of the Asserted Patent. *See Stone Basket Innov. v. Cook Medical*, 892 F.3d 1175, 1179 (Fed. Cir. 2018) (“when prior art is listed on the face of a patent, the examiner is presumed to have considered it”) (citing *Shire LLC v. Amneal Pharm., LLC*, 802 F.3d 1301, 1307 (Fed. Cir. 2015)); *Exmark Mfg. v. Briggs & Stratton*, 879 F.3d 1332, 1342 (Fed. Cir. 2018).

24. After giving full proper credit to the prior art and having conducted a thorough search for all relevant art and having fully considered the most relevant art known at the time, the United States Patent Examiner allowed all of the claims of the '799 Patent to issue. In so doing, it is presumed that Examiner Moorthy used his knowledge of the art when examining the claims. *K/S Himpp v. Hear-Wear Techs., LLC*, 751 F.3d 1362, 1369 (Fed. Cir. 2014). It is further presumed that Examiner Moorthy had experience in the field of the invention, and that the Examiner properly acted in accordance with a person of ordinary skill. *In re Sang Su Lee*, 277 F.3d 1338, 1345 (Fed. Cir. 2002). In view of the foregoing, the claims of the '799 Patent are novel and non-obvious, including over all non-cited art which is merely cumulative with the referenced and cited prior art. Likewise, the claims of the '799 Patent are novel and non-obvious, including over all non-cited contemporaneous state of the art systems and methods, all of which would have been known to a person of ordinary skill in the art, and which were therefore presumptively also known and considered by Examiner Moorthy.

25. The claims of the '799 Patent were all properly issued, and are valid and

enforceable for the respective terms of their statutory life through expiration, and are enforceable for purposes of seeking damages for past infringement even post-expiration. *See, e.g., Genetics Institute, LLC v. Novartis Vaccines and Diagnostics, Inc.*, 655 F.3d 1291, 1299 (Fed. Cir. 2011) (“[A]n expired patent is not viewed as having ‘never existed.’ Much to the contrary, a patent does have value beyond its expiration date. For example, an expired patent may form the basis of an action for past damages subject to the six-year limitation under 35 U.S.C. § 286”) (internal citations omitted).

26. Moreover, any arguments relating to eligibility as may be made by Defendant here are necessarily merely cumulative with those already considered, and rejected, by the Patent Examiner in allowing the Asserted Patent. *See, e.g., Technology Licensing Corp. v. Videotek, Inc.*, 545 F.3d 1316, 1337 (Fed. Cir. 2008); *Stone Basket*, 892 F.3d at 1179.

ACCUSED INSTRUMENTALITIES

27. On information and belief, Defendant sells, advertises, offers for sale, uses, or otherwise provides exemplary products, including at least the Exabeam Fusion XDR, which is a threat detection, investigation, and response (TDIR) platform that comprises a set of technologies used for cybersecurity purposes within the different parts of organizations. The foregoing are referred to as the “Accused Instrumentalities.”

COUNT I

(INFRINGEMENT OF UNITED STATES PATENT NO. 8,938,799)

28. Plaintiff refers to and incorporates the allegations in Paragraphs 1 - 27, the same as if set forth herein.

28. This cause of action arises under the patent laws of the United States and, in particular under 35 U.S.C. §§ 271, *et seq.*

29. Defendant has knowledge of its infringement of the ’799 Patent, at least as of the

service of the present complaint.

30. The '799 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

31. Upon information and belief, Defendant has infringed and continues to infringe one or more claims, including at least Claim 14, of the '799 Patent by manufacturing, using, importing, selling, offering for sale, and/or providing (as identified in the Claim Chart attached hereto as Exhibit B) the Accused Instrumentalities which infringe at least Claim 14 of the '799 Patent. Defendant has infringed and continues to infringe the '799 patent either directly or through acts of contributory infringement or inducement in violation of 35 U.S.C. § 271.

32. Defendant also has and continues to directly infringe, literally or under the doctrine of equivalents, at least claim 14 of the '799 Patent, by having its employees internally test and use these exemplary Accused Instrumentalities.

33. The service of this Complaint, in conjunction with the attached claim chart and references cited, constitutes actual knowledge of infringement as alleged here.

34. Despite such actual knowledge, Defendant continues to make, use, test, sell, offer for sale, market, and/or import into the United States, products that infringe the '799 Patent. On information and belief, Defendant has also continued to sell the exemplary Accused Instrumentalities and distribute product literature and website materials inducing end users and others to use its products in the customary and intended manner that infringes the '799 Patent. *See Exhibit B* (extensively referencing these materials to demonstrate how they direct end users to commit patent infringement).

35. At least since being served by this Complaint and corresponding claim chart, Defendant has actively, knowingly, and intentionally continued to induce infringement of the

'799 Patent, literally or by the doctrine of equivalents, by selling exemplary Accused Instrumentalities to their customers for use in end-user products in a manner that infringes one or more claims of the '799 Patent.

36. Exhibit B includes at least one chart comparing the exemplary '799 Patent Claims to the exemplary Accused Instrumentalities. As set forth in this chart, the exemplary Accused Instrumentalities practice the technology claimed by the '799 Patent. Accordingly, the exemplary Accused Instrumentalities incorporated in this chart satisfy all elements of at least claim 14 of the '799 Patent.

37. Plaintiff therefore incorporates by reference in its allegations herein the claim chart of Exhibit B.

38. Plaintiff is entitled to recover damages adequate to compensate for Defendant's infringement.

39. Defendant's actions complained of herein will continue unless Defendant is enjoined by this court.

40. Defendant's actions complained of herein are causing irreparable harm and monetary damage to Plaintiff and will continue to do so unless and until Defendant is enjoined and restrained by this Court.

41. Plaintiff is in compliance with 35 U.S.C. § 287.

DEMAND FOR JURY TRIAL

42. Plaintiff, under Rule 38 of the Federal Rules of Civil Procedure, requests a trial by jury of any issues so triable by right.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff asks the Court to:

- (a) Enter judgment for Plaintiff on this Complaint on all causes of action asserted herein;
- (b) Enter an Order enjoining Defendant, its agents, officers, servants, employees, attorneys, and all persons in active concert or participation with Defendant who receive notice of the order from further infringement of United States Patent No. 8,938,799 (or, in the alternative, awarding Plaintiff running royalties from the time of judgment going forward);
- (c) Award Plaintiff damages resulting from Defendant's infringement in accordance with 35 U.S.C. § 284;
- (d) Award Plaintiff pre-judgment and post-judgment interest and costs; and
- (e) Award Plaintiff such further relief to which the Court finds Plaintiff entitled under law or equity.

Dated: April 12, 2024

Respectfully Submitted,

/s/ Randall Garteiser
